SUMMARY

Information Systems student at Primakara University with 2+ years of hands-on experience building web applications using Next.js, React, JavaScript, and TypeScript. Experienced in front-end development, database schema design, and rapid landing-page delivery for client projects. Seeking a Junior Full-Stack Web Developer role to apply and grow this technical foundation.

WORK EXPERIENCE

Web Developer Intern

May 2022 – Sept 2022

Pilar Kreatif

- Built landing pages using HTML, CSS, and JavaScript to specification for external clients.
- Managed and updated content as web admin for a travel landing page.
- Used a no-code web builder to deliver landing pages on tight turnaround times.
- Developed front-end components with React JS, strengthening component-based UI development skills.

Final Project — School Fee Payment System

April 2023

Wira Harapan Vocational High School

- Designed a relational database schema for a school fee payment application.
- Built the application using PHP, MySQL, and Apache on a local XAMPP environment.
- Implemented the dashboard UI with SB Admin and Bootstrap CSS for a responsive interface.

EDUCATION

Bachelor of Computer Science, Information Systems

Aug 2023 – Present

Primakara University — University of Technology

- Focused coursework on web, game, and mobile application development.
- Developed web applications using Next.js, React, TypeScript, Tailwind CSS, Supabase, and Firebase.

Software Engineering (Vocational)

Aug 2020 – July 2023

Wira Harapan Vocational High School — Vocational High School of Tourism and Technology

- Built programming logic foundations in C++ and Java.
- Completed a final project using PHP, Apache, and MySQL for web-based application development.
